

Custom Designed Family Tree Charts

Let Us Turn Your Family Tree
Into A Work Of Art

Maxbal Genealogy

Creating A Custom Family Tree Chart Just For You

What do you do with all of the information that you have so painstakingly researched about your family? Do you keep it locked away in your computer or your research file?

What better way of enjoying the fruits of your labour than to have it displayed on a custom designed family tree chart that can be enjoyed and admired for generations to come.

Custom Designed Charts

A custom designed chart is created specifically for you. It is a unique one-off chart and no one else will have one exactly like it. You are in complete control of the chart type, size, colours and graphics used. You will want it either for a working/reference chart or as a high quality chart to display your family tree.

Many of the genealogy programs let you create just a few limited styles of family tree charts and it is often impossible to lay the chart out just the way you want it. You do not have these restrictions with a Maxbal designed chart—it is created how you want it and can include your own pictures and graphics. We involve you in every step of the design process and we do not compromise on quality.

Working/Reference Charts

These charts help you to organise your research and generally show everyone in the family tree. Working charts can quickly become very large and tend to spend most of their life stored away. They can soon become out of date as your research uncovers more people and you may want them reprinted 2 or 3 times. Our black on white charts are the perfect cost effective solution.

Display Charts

These charts are designed for hanging on your wall. Ready for framing, they are outstanding designs printed in high quality on media such as photographic, parchment and canvas. Charts that you will be proud to display and can live with for years to come. The perfect family heirloom.

The Basic Types Of Charts

Ancestor— shows the direct line ancestors of an individual.

All-in-One— shows everyone in your family tree.

Descendant— shows all descendants of a couple.

Hourglass— shows both ancestors and descendants of an individual or a couple.

Partners— shows the direct line ancestors and children of a couple.

All Relatives—shows ancestors, descendants and all other relatives too, aunts, uncles and cousins (no matter how many times removed), nephews and nieces. You can also include in-laws if you wish.

You can also include your ancestors siblings and their families in the charts and include, or exclude, any individual or group of individuals.

How Big Will Your Chart Be

The size of your chart is governed by the number of individuals and the amount of information that you want to display about them. We do not know the final size of the chart until it has been designed but we will let you know what it is and the price before you commit to purchase. Where possible we will fit your chart to a standard paper size for which prices are shown in the table opposite. If you have a specific wall space for your chart let us know how big it is and we will design your chart to fit.

Custom Family Tree Charts Price List

DISPLAY CHARTS	Full Colour On Glossy Or Satin Photographic Media	Single Colour Black On Parchment	Full Colour On Canvas
Size			
A4 (210 × 297 mm - 8.27 x 11.69 inches)	£15.00	£12.50	£30.00

WORKING CHARTS		Price Per Metre	
Printed in single colour black on white paper—up to 60 cm tall		£8.00	
Printed in single colour black on white paper—up to 84 cm tall		£10.00	

The prices include chart design and printing. We design and print your chart from any of the popular genealogy programs or from a GEDCOM file which you can generate from your Genealogy software. But don't worry if you don't use a genealogy programme because we can take your information in written format and do the data entry for you. The only additional costs of your chart are delivery and transcribing your data. There are no transcription costs if the data is supplied as a genealogy program or as a GEDCOM file.

The charge for transcribing your data is £25 per 50 individuals and we will send you the GEDCOM file which you can use to start off your own family tree database. The transcription charge is the only cost that we ask you to pay when you place your order.

We offer you a completely **risk free** service in that we do not ask for payment up front for chart design. We will work with you through the design process to ensure that you get exactly what you want. You receive full size drafts in pdf format for your approval along with costs and you only make payment once you approve the final design for print.

What Do You Do Next?

Just send us your GEDCOM file or your information, by email. If your information is not in electronic format send it to us by normal post. Tell us the type of chart that you want and the starting individual(s) then we will do the rest - design the chart, send you a proof and tell you how much it will cost.
